What Sets Us Apart

SPEED. CERTAINTY. TRUST

Speed You Can Count

- On Fast Track: Custom gaskets shipped in 24 hours
- Flash Track: Same-day cutting for true emergencies
- U.S. Office: TT Gaskets North America, based in Milwaukee, WI
- Smart Inventory: On-site virtual warehousing & kitting options

Engineering-First Approach

- Co-design support for prototypes or high-volume
- 3,500+ materials in stock
- Full technical documentation: **PPAPs, EN1591-4, Fujifilm testing**

Sustainability That Matters

- 100% carbon-neutral operations
- Eco-smart packaging
- Backed by international certifications: **Ecovadis Gold, SA8000**
- Seamless ESG alignment for your supplier scorecard

Built for the Future of Energy

- We support clean energy tech like hydrogen, fuel cells, and carbon capture with advanced materials and designs—partnering with Flexitallic for Thermiculite®, Corriculite®, and more.

Lifecycle Partner, Not Just a Supplier

From First Sketch to Final Seal—Faster.
We partner with you across the full lifecycle:

ENGINEERING & CO-DESIGN
Collaborate early, design better

PROTOTYPING & TESTING
Rapid iteration and validation

PRECISION PRODUCTION
In-house, high-accuracy manufacturing

ON-CALL SUPPORT
For field service, retrofits, and shutdowns

Whether you're building next-gen hydrogen systems or keeping legacy equipment–online we're with you from concept to install. U.S. clients benefit from same-day support, rapid prototyping, and integrated engineering guidance throughout the sealing lifecycle.

What We Make:

Gaskets.
Components.
Insulation.

GASKETS & SEALING SOLUTIONS

- Flange gaskets (spiral wound, camprofile, metal, soft)
- Rubber-metal, graphite, PTFE, plastics
- 3,500+ materials in stock

PRECISION-MACHINED METAL COMPONENTS

- Shims, washers, mounting brackets
- Tight-tolerance laser cutting and stamping

THERMAL & ACOUSTIC INSULATION

- Cellular foams, glass wool, felt
- Designed for enclosures, engines, and HVAC applications

Clean Energy Ready

SEALING THE NEXT GENERATION OF ENERGY

From hydrogen pipelines and fuel cells to carbon capture and ammonia systems, TT Gaskets supports the clean energy transition with materials and designs built to perform under pressure.

- Zero-leak sealing for volatile media
- Fire-safe and high-temp material options
- Documentation and traceability for regulated environments

Sustainability with Substance

LOWER EMISSIONS. LESS WASTE. MORE TRUST.

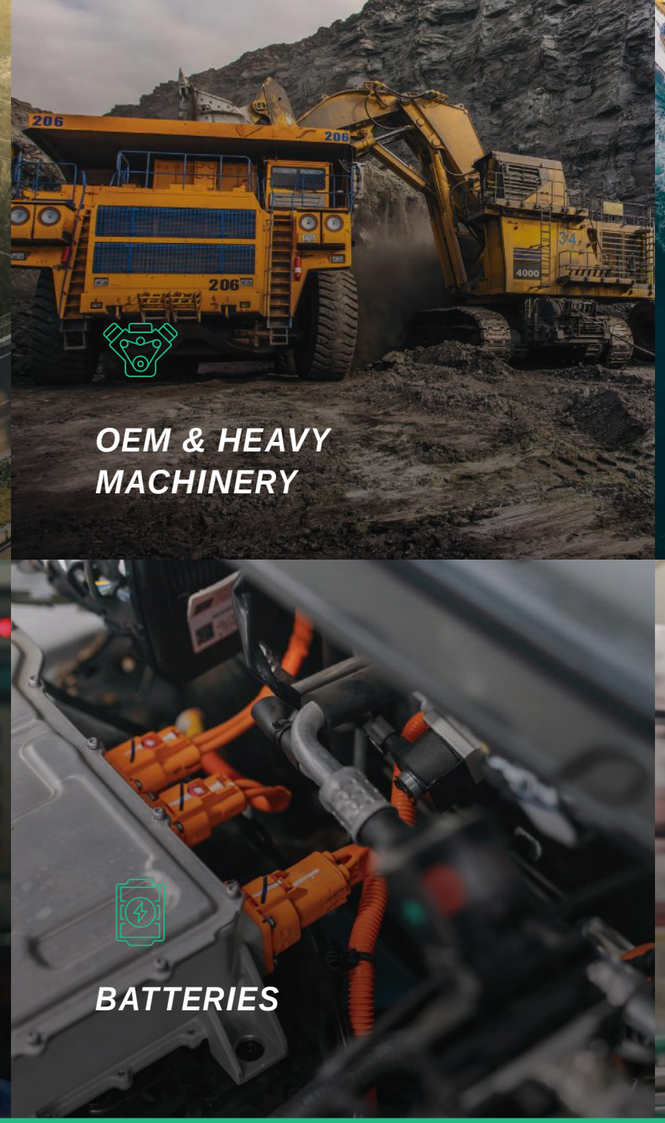

We don't just manufacture efficiently—we operate responsibly. All the ESG compliance your procurement team is looking for—without compromising on performance.

- 100% carbon neutral production
- Plastic-free and recycled packaging options
- Ecovadis Gold, SA8000 certified
- Designed to reduce energy loss, waste, and downtime

Industries We Serve

We work with global leaders in:

Need a sealing solution for something unusual? Let’s talk.

When the pressure is on, We're Ready.

Want to reduce downtime, simplify sourcing, and gain a sealing partner who's ready when you are?

THE RESPONSE YOU NEED.
THE SPEED YOU EXPECT.
THE PARTNER YOU TRUST.
